

We're
here
for you

The last thing you need when undergoing a new software system implementation is costly interruptions to your business process.

These can potentially affect your bottom line and disrupt customer relationships.

Kinetic have an excellent track record in rapidly delivering business solutions on time, without hassle and within budget.

Partners in your Business Solution.

From the word 'go' we focus all our attention on planning with you to find the best possible outcome for your organisation. That's why we stand by our philosophy of being 'Partners in Your Business Solution'. Simple really!

Design and Implementation

You want to get the most out of your new system and you want everybody that uses the software to fully understand it's capability.

Our implementation methodology has been developed to enable you to maximize the benefits of your new business system. Once again it's all about what suits you and what works best for you, in your market with your resource. We have a proven track record of successful 'hands on' implementations, so we think we've got it right!

Of course you want to 'Minimise Risk' ...who wouldn't?

A significant component of our project initiation process focuses on identification of project risks and consequential organisational risks.

The result of this analysis is the development of specific risk management plans. We are well aware of the impact the implementation of a new Management Information System can have on an organisation, and how critical a role change management can play in the success of these projects.

Moving forward our project management methodology consistently focuses on risk management and changing risk profiles. This ensures you can be confident of a 'stress-free' future, with potential pitfalls absolutely minimised.

Training

Invest in your most important asset...your staff!

A successful implementation relies on your people being able to use your business solution to your best advantage. To achieve this, an initial and ongoing investment in the building of your people's knowledge is essential. We provide structured training designed with your business and objectives in mind. This includes documentation specific to your business practices, providing a resource both for your people to refer to as well as the basis of succession plans.

Ongoing Analysis and Support

Ongoing business success relies on the validity of partnerships. The value in our partnership with you is revealed as reliable business continuity.

This will consistently help you achieve your business goals. We guarantee to work with you to continuously improve and innovate your business processes.

FAQs

Q: What types of businesses use the Greentree solution?

A: Greentree products are an excellent choice for any Australasian medium sized business. They are scalable and tailorable to your needs and can be suitably optimized to meet your business ambitions.

Q: What sets Kinetic apart from other information systems providers?

A: The Kinetic team has international experience in many industries, with businesses of varying sizes. We understand what makes businesses tick and how the right solution can make all the difference.

Q: How much ongoing support can I expect from Kinetic?

A: The simple answer is that you can have as much or as little support as you want or need. In a nutshell, we're here for you!

Q: How regular are enhancements and updates?

A: Greentree enhancement updates may occur as frequently as every day, but you choose how often they are applied to your system. This can ensure you have the latest and greatest functionality and enhancements as you need them. **Kinetic will be there to support you, just when you are ready!**

Q: Do I have to buy a separate database?

A: No, unlike other systems, Greentree comes with the database and user licenses included in the purchase price, and there are no maintenance fees to pay on it. Total cost of ownership is effectively far lower than comparable systems.
